Coinbase Tutorial

# Introduction

- ▶ Hello! This is a tutorial on how to receive your earnings. Firstly, you will download and create an account for the Helium app, this is where we will send you your HNT. Next, you will send your HNT to Binance and convert it to USDT, creating a Binance account if you don't already have one. Then, you will send your USDT to your Coinbase account, creating an account if you don't already have one. Finally, you will sell your USDT on Coinbase, for GBP, and withdraw it to your bank account. The steps to do this are covered by this PowerPoint. This isn't the only way to sell your HNT - this is how we do it as a business, but you may find a more efficient way, and if so, you can use that route instead.
- ▶ Remember to pay your taxes, you will be sent an invoice via email to assist you with this.
- ▶ Please feel free to contact any of the team directly using the contact information below if you have any questions about this tutorial, we are always happy to help.
